KNOWLEDGE IN YOUTH

IS

WISDOM IN AGE

whitehall
michigan
1952

In this book we have tried to portray the steps of knowledge. Thru the future years this knowledge will, in some, mature to wisdom. But the future which the graduating senior of 1952 faces is uncertain. We have recorded the present; the future is unpredictable.

Many changes have taken place since the publication of the last CRYSTAL in 1940, a major one being the addition of a beautiful modern grade school to Whitehall's education facilities.

To the high school students the older building symbolizes the value of the traditional, contrasted with the modern.

his book is dedicated to Walter Finkbeiner, who guided the Class of 1952 during four of their six years of high school. He assisted them thru many difficulties in their search for knowledge and truth.
